2.9	Seminars & Workshops since Aug. 2005 (Arrival to Canada)	9
3	Other Evidence of Impact and Contributions	11

1 Research Topics

List of research topics: partial differential equations, numerical analysis, mathematical and computational physics.

- Microlocal and pseudodifferential analysis of domain decomposition methods for quantum wave linear and nonlinear equations. Analysis of Schwarz Waveform Relaxation methods: [A34], [A39], [A40], [A41], [A43], [A45], [A46], [A48].
- Microlocal analysis-based Absorbing Boundary Conditions for relativistic and nonrelativistic wave equations (Schrödinger, Dirac): [A33], [A13], [A42].
- Mathematical relativistic quantum physics and Weyl-Titchmarsh-Kodaira theory : pair-production, Schwinger's effect, Dirac equations: [A27], [A26], [A24], [A22]. Gauge theory: [29].
- Mathematical modeling in multiscale nonperturbative nonlinear optics, filamentation-laser and attosecond science, Maxwell-Schrödinger and Liouville equations, applied spectral theory: [A38], [A36], [E2], [A35], [A28], [A21], [A23], [A17], [A11], [A9], [A7].
- High order and parallel methods in quantum physics for Dirac, Schrödinger equations: Galerkin methods, high order B-splines, balanced-operators, High order splitting methods. [A37], [A31], [A20], [A19], [A18], [A44].
- Nonconservative hyperbolic systems of conservation laws, LeFloch-DalMaso-Murat path-theory: [A25], [A15].
- Derivation and analysis of non-diffusive finite volume methods for hyperbolic systems of conservation laws: reservoir technique. [A12], [A10], [A1].
- High performance Computing in computational physics, MPI/C++, Distributed parallel computing. [A37], [P10], [P7], [A9]

2 Research Contributions

2.1 Articles

- [A45] X. Antoine, E. Lorin. Two-dimensional asymptotic estimates of the convergence of SWR-DDM for stationary classical and quantum waves. Revision *ESAIM: Numerical Analysis and Mathematical Modeling (M2AN)*, **2017**.
- [A44] E. Lorin. Computational performance of simple and efficient sequential and parallel Dirac equation solvers. Accepted in *Comput. Phys. Comm.*, **2017**.

2.4 Research reports

- [R5] E. Lorin, S. Gowda, Y. Saad, M. Tiago, J.R. Chelikowsky. Technical report University of Minnesota Supercomputing Institute Research Report **UMSI 2005/96**, **2005**.
- [R4] *Inclusion de Numerical Platon dans OVAP*. Technical report Commissariat à l’Energie Atomique (France). **CEA/Saclay/DM2S/SFME/LGLS/RT/01-013A**, **2001**.

- [R3] *Implicitation en flux des schémas de flux*. Technical report Commissariat à l’Energie Atomique (France). **CEA/Saclay/DM2S/SFME/LGLS/RT/01-010, 2001**.
- [R1-R2] *Trends in Numerical & Physical Modeling for Industrial Multiphase Flows*, Corse, **2001, 2005**.

2.5 Editorial tasks

- [E3] Member of Editorial Board. *Advances in Mathematical Physics* (**2015**-to date)
- [E2] Editor (with A. Bandrauk, J. Moloney): Book on ”Mathematical methods and models in Laser Filamentation” (~10 chapters). *Springer, CRM Series.*, **2016**.
- [E1] Edition of a special issue of the *Canadian Applied Mathematics Quarterly*, celebrating the 30th Anniversary of the CAIMS meeting, **2010/2011**.

2.6 Long term funded invitations (Since 2010)

- Invited Researcher at KITP (Kavli Institute for Theoretical Physics) at University of California at Santa Barbara (2 weeks), April **2015**.
- Invited Professor in the Mathematics department at the University of California at Santa Barbara (1 month), Jan. **2015**.
- Invited Researcher at the KITP at University of California at Santa Barbara (1 month), Sept. **2014**.
- Invited Professor in the Applied Mathematics department, Université de Grenoble, France (2 months), May-June **2011**.

2.7 Software

Some software that I have (co-)developed.

- [S0] Development of a parallel 2d/3d (MPI,C++) Time Independent and Dependent Dirac solver (**2013-2016**). Atomic balance, Finite element method with B-splines basis. (www.ccs.usherbrooke.ca/mammoth).
- [S1] Development of a parallel 2d (MPI,C++) Maxwell-Dirac code (**2010-2012**) for relativistic laser-matter interactions and propagation (www.ccs.usherbrooke.ca/mammoth).
- [S2] Development of a 3d-parallel (MPI,C++) Maxwell-Schrödinger-Plasma code (**2005-2014**) for laser-matter interactions and propagation (www.ccs.usherbrooke.ca/mammoth).
- [S3] Development of a C++ parallel quantum chemistry simulation code at the University of Minnesota (**2002-2003**). The code is installed at the Minnesota Supercomputing Institute and computes optical spectra of molecules.

- [S4] Implementation of new numerical methods for electronic structure calculation in Abinit (www.abinit.org), (**2002**). We proposed a new $\mathcal{O}(N)$ method particularly efficient at high temperatures and for big molecules, instead of usual $\mathcal{O}(N^3)$ methods.
- [S5] Participation in the development of the Oriented-Object code TRIO_U (**2001**), at the French Atomic Energy Center (CEA). I implanted a new 3d numerical implicit finite volume scheme for simulation of two phase flows inside the core of power stations.

2.8 Industrial Projects

- MITACS cluster-project (*granted*). Name of the company: **general fusion** (British Columbia). Modeling and computations for MTF-based nuclear reactor (HQP: 2 PDF, 1PhD), \$133,000 **2010-12**.
- Name of the company: **INO** (Québec). Optimization of laser-metal ablation. (HQP: 1 PDF), \$25,000, **2013**.

2.9 Seminars & Workshops since Aug. 2005 (Arrival to Canada)

- Workshop *High-dimensional partial differential equations in science and engineering*, CRM, Montréal, Aug. **2005**.
- Scientific Computing Days at the CRM, Montréal, Feb. **2006**.
- Seminar of Applied Mathematics at Carleton University, Ottawa, Feb. **2006**.
- Seminar of Applied Mathematics at Université de Montréal, Montréal, April **2006**.
- Seminar of Theoretical Chemistry, University of Sherbrooke, Sherbrooke, April **2006**.
- *36th AIAA Fluid Dynamics Conference and Exhibit*, San Fransisco, June **2006**.
- *1st International Symposium on lasers*. Laval University, Québec, Sept. **2006**.
- Seminar of Applied Mathematics at Ecole Polytechnique de Montréal, Oct. **2006**.
- Seminar of Applied Mathematics at Concordia University, Montréal, Dec. **2006**.
- Workshop on ultrafast lasers, Laval University, March **2007**.
- Applied Mathematics seminar, University of Ontario Institute of Technology, March **2007**.
- Mathematics seminar, University of Sherbrooke, May **2007**.
- Mathematics seminar, Laval University, June **2007**.
- *76th ACFAS conference*, Québec City, May **2008**.

- *2nd Canada-France Congress of Mathematics*, Montréal, June **2008**.
- *22nd Annual International Symposium on High Performance Computing Systems and Applications (HPCS 2008)*, Québec City, Canada. IEEE Computer Society, June **2008**.
- *5th European Congress on Computational Methods in Applied Sciences and Engineering (ECCOMAS 2008)*, Venise, July **2008**.
- Seminar of Applied Mathematics, Ottawa University, Nov. **2008**.
- CMS Winter Meeting: Session Applied PDEs, Ottawa, Dec. **2008**.
- CMS Winter Meeting: Session Numerical Analysis, Ottawa, Dec. **2008**.
- Seminar Mathematics, Carleton University, Dec. **2008**.
- Seminar Physics & Chemistry, Trent University, March **2009**.
- Workshop on Computational Hyperbolic Systems, Fields Institute, April **2009**.
- CAIMS Meeting 2009, University of Western Ontario, June **2009**.
- Workshop on Quantum Dynamic Imaging, CRM, Nov. **2009**.
- Seminar in Applied Mathematics, McGill, March **2010**.
- Physics Seminar, Commissariat à l’Energie Atomique (France), June **2011**.
- Applied Mathematics seminar, Ecole Normale Supérieure de Cachan (France), June **2011**.
- Applied Mathematics seminar, Université de Chambéry (France), June **2011**.
- Applied Mathematics, Modeling and Computational Science Conference, Session “Computational Methods for Hyperbolic Problems”, Waterloo, July **2011**.
- Applied Mathematics, Modeling and Computational Science Conference, Session “Computational Physics and Chemistry”, Waterloo, July **2011**.
- *4th Workshop on Industrial Mathematics*. Coordinator for INO project, Montréal, Aug. **2011**.
- Applied Mathematics seminar, State University of New York at Buffalo, Feb. **2012**
- Canadian Mathematics Society Meeting, Montréal. Session: applied mathematics, Dec. **2012**.
- Canadian Mathematics Society Meeting, Montréal. Session: quantum imaging, Dec. **2012**.

- Canadian Applied and Industrial Mathematics Society Meeting, Québec City. June **2013**.
- Applied Mathematics, Modeling and Computational Science Conference, Session “Computational Methods for Hyperbolic Problems”, Waterloo, Aug. **2013**.
- International Workshop on mathematical methods and models in laser-filamentation, Montréal, March **2014**.
- Applied Mathematics seminar, University of Ontario Institute of Technology, April **2014**.
- KITP at University of California Santa Barbara, Aug. **2014**.
- University of Ottawa, Physics Seminar, January **2015**.
- Applied Mathematics seminar, University of California Santa Barbara, Jan. **2015** (2 talks).
- Applied Mathematics, Modeling and Computational Science Conference, Session “Numerical Analysis”, Waterloo, Aug. **2015**.
- CRM Networking Industrial Workshops - Photonics, Centre de Recherches Mathématiques, Montréal, Sept. **2015**.
- Workshop on Math.&Comput. Methods in Quantum Chemistry, Fields Institute, Feb. **2016**.
- Symposium Molecules & Laser Fields, Orford, May **2016**.
- AIMS-2016, Orlando, June **2016**.
- KI-NET conference, University of California Santa Barbara, Nov. **2016**.
- CAIMS Conference, University of Alberta, June **2016**.
- Quantum and Kinetic Problems, CSRC, Beijing, June **2017**.
- From Quantum Dynamics to Quantum Information, BIRS/CMO, Mexico, August **2017**.

3 Other Evidence of Impact and Contributions

Co-organizer of Conferences and Workshops

- Annual Congress of the French Society of Applied and Industrial Mathematics SMAI2005, France, June **2005**.

- Fourth Montréal Scientific Computing Days, Montréal, April **2007**.
- Durham Regional Youth Science Foundation Science Fair (chair), Oshawa, April **2008**.
- Special Session *Numerical Analysis for Hyperbolic Systems of Conservation Laws* at Canada-France Congress of Mathematics (14 invited speakers), Montréal, June **2008**.
- Durham Regional Youth Science Foundation Science Fair (chair), Oshawa, April **2009**.
- SHARCNET Research Day 2009, Waterloo University, May **2009**.
- Seventh Montréal Scientific Computing Days, Montréal, May **2013**.
- Fields Workshop on Numerical Methods for Fluid Dynamics, Aug. **2013**.
- International Workshop on Mathematical Modeling and Analysis of Filamentation (Centre de Recherche Mathématiques, Montréal), March **2014**.
- Eighth Montréal Scientific Computing Days, Montréal, May **2015**.
- Program committee member: Conference on Lasers and Electro-Optics/Europe and the European Quantum Electronics Conference (CLEO 2015), June **2015**.
- Program committee member: Conference on Lasers and Electro-Optics/Europe and the European Quantum Electronics Conference (CLEO 2017), June **2017**.
- Banff/CMO. From Quantum Dynamics to Quantum Information Theory, August **2017**.
- DDM-25: International Conference on Domain Decomposition Methods, St-John, Canada, **July 2018**.

Referee tasks

- Referee for: *Ann. Math. Québec, Appl. Math. and Comput., Appl. Num. Math., Comput. Methods Appl. Mech. Engrg., J. of Comp. and Applied Math., Comput. Phys. Comm., Eur. J. Mech. B Fluids, Comm. Partial Differential Equations, J. of the Optical Soc. of America B, Proceedings of Royal Society A, J. Phys. B, Physica D, Chemical Physics, Appl. Math. Lett., International Journal of Computer Mathematics, J. Comput. Phys., Optics Lett.*, International conferences.
- Selection Committee Member: Fonds de Recherche du Québec - Nature et Technologies (FQRNT), **2012/2015**. Math. Committee B2 (Scholarship for MSc/PhD).
- Reviewer for NSERC (Collaborative Research and Development program), **2013**.
- Review for The Mathematics of Information Technology and Complex Systems (MITACS), **2015**.
- Review for US-Department of Energy (DOE), **2016**.

- Reviewer for NSERC (I2I program), **2017**.

Defense committee: Reviewer

- Master thesis defense of M. McLeod at Ottawa University. Mixed finite element methods for Stefan-Maxwell equations, September 2013.
- Master thesis defense of L. Charette at Ottawa University. Lattice symmetry breaking perturbation for spiral waves, June 2013.
- Master thesis defense of J. Pellerin at Ecole Polytechnique de Montréal. Un potential d'interaction pour les lois de conservation non classiques, March 2011.
- PhD thesis defense of A. Ben Haj Ali at Ecole de Technologie Supérieure (University of Québec). High performance computing in aeroelasticity and 3d turbulent flows, Aug. 2008.
- Master thesis defense of C.Y. Liu at Ecole Polytechnique de Montréal (University of Montréal). Adjoint-based error estimation for the front-tracking method, Aug. 2007.
- PhD thesis defense of M. Rioux at Ottawa University. Numerical computations of action potentials for the heart-torso coupling problem. Nov. 2011.
- PhD thesis defense of D. MacLaren at Ottawa University. Sequential and localized implicit wavelet-based solvers for stiff partial differential equations. Feb. 2012.
- PhD thesis defense of H. Beauchesne at Carleton University. Possible avenues in supersymmetry and naturalness. August 2016.
- PhD thesis defense of E. Kardashi at University of Montréal. Stabilité des chocs non classiques pour des lois de conservation non convexes. April 2017.
- MSc thesis defense of X. Chen at Carleton University. Cooperative Linear-Quadratic Mean Field Game Control and Hamiltonian Matrix Analysis. April 2017.
- PhD thesis defense of J. Bramburger at Ottawa University. On the existence and stability of rotating wave solutions to lattice dynamical systems. June 2017.
- PhD thesis defense of K. Choon Loy at Ottawa University. Semi-implicit schemes incompressible Navier-Stokes equations. June 2017.

Research Grants and Fellowship

- NSERC Discovery Grant : \$15,000/year, GSC Pure and Applied Maths B 337, 2013-2018.
- Co-applicant (with 6 others) of a granted Research Tools Instruments (NSERC), \$46,068, (2012).

- Fields Institute Funds for Post-Doc. Fellowship (\$12,500) (2011-2012).
- CRM/ISM Funds to hire a Post-Doc. Fellowship (\$7,500 shared with Prof. A. Bandrauk), (2012)
- Invited Professor (May-June 2011). Applied Mathematics Department at Université Joseph Fourier - Grenoble I (France). €7,500.
- P.I. of a *granted* MITACS Project (**cluster**): 2 post-docs, 1 PhD, Travel Subsidy Award. Collaboration with the company *General Fusion* (Vancouver), and Prof. M. Laforest (*Ecole Polytechnique de Montréal*), \$133,000 over 2 years, 2010/2012.
- Research Grant as SHARCNET siteleader: \$8,000 / year, 2008/09.
- CRM/ISM Funds to hire a Post-Doc. Fellowship (\$20,000 shared with Prof. A. Bandrauk).
- Participation (P.I. in Ontario) to a *granted* \$2,377,000 CFI/NFI project on Dynamic Imaging and Visualization: iMOVI, 2009 (Participation withdrawn due conflict with Compute Canada policy).
- CRM-ISM Postdoctoral Fellowship (Montréal), 2005-2007.
- AUF (Agence universitaire de la Francophonie) *Granted* project on the Shallow Water Equations (collaboration Canada/France/Maroc): €20,000, 2006.
- Supercomputing Institute Research Scholarship (Minnesota Supercomputing Institute, University of Minnesota), 2002.
- Research Contract, Commissariat à l’Energie Atomique, Service de Mécanique de Fluides, Saclay 2000.

Current Students

- M. Lytova, PhD.
- D. Charles, Honours.

Past Students

- T. Hof McNeil, MSc.
- F. Fillion-Gourdeau, Post-Doc., co-supervision with A. Bandrauk.
- F. Hou, Research Assistant.
- F. Albeshree, MSc in Applied Maths (Course).
- A. Capuano, Honours Student (Thesis not defended).

- A Memarian, Honours Student. Defense Jan. 2014.
- J. Sater, MSc in Applied Maths (Thesis). Defense Oct. 2012
- K. Lyon, Summer Student (2012).
- R. Arteaga, Research Assistant/ Honours Student (2011-2012).
- H. Rizq, MSc in Applied Maths (2014).
- M. Kazemina, PhD Student (registred at Ecole Polytechnique de Montréal), co-supervision with Prof. M. Laforest (2010-2012).
- P. Turbis, Post-Doc., co-supervision with Prof. M. Laforest (2011-2012).
- X. Lavocat-Dubuis, Post-Doc. (2010-2011)
- E. Zaoui, CRM/ISM Post-Doc., partially funded (50%) by the *Centre de Recherches Mathématiques* (2009-2010).
- N. Chalmers, Honours/MSc Student then Research Assistant, *Carleton University* (2010).
- +3 Honours students at UOIT (2008,2009).
- +3 Master students, Université Paris-Sud-Orsay (2002-2005).
